

Event Sustainability Policy Statement

Our ESMS policy is to deliver all types of events like conferences, exhibitions training, competitions and festivals at Youth Activities Directorate and Youth Centres Directorate that combines quality, substance and sustainability.

We follow the core aim of sustainable development as "development that meets the needs of the present without compromising the ability of future generations to meet their own needs". This means, we are conscious of MYS events' social, economic and environmental impact in all that we do.

We seek to reduce the negative effect of what we do as much as possible, but more than that we seek to find ways in which to make a positive difference through our own actions and seeking to influence the actions of others.

Our work is governed by the core principles of sustainable development: Integrity, Transparency, Inclusivity and Stewardship as referred in our statement of purpose and values.

This policy explains our approach to sustainability, showing how we live our values. We also take into consideration the requirements of supply chain management, the entire event management cycle, the output from engagement with interested parties, legacy issues and needs of end user.

We are committed to continual improvement of our Event Sustainability Management system to enhance our performance each year, or for each event.

This policy is displayed at different locations of MYS and communicated to all our staff under the scope. In addition, our policy has been circulated to all the interested parties and also our stake holders.

Hisham bin Mohammed Al Jowder
Minister of Youth & Sport Affairs
